

# AHCA/NCAL Gero Nurse Prep

When you have to replace an RN, the average cost is a hundred thousand dollars. By the time you find the right candidate, hire, train, and help them become productive, it could cost 150% of their base salary. It's a lot less expensive to keep the employees you have, especially in a competitive market!

## ▶ HERE'S HOW OUR COURSE CAN HELP

- Gero Nurse Prep prepares RNs for successful attainment of board certification as Gerontological Nurses, the gold standard of excellence.
- Employer support for continuing education and board certification can increase RN job satisfaction.
- Satisfied, well-trained, and committed RNs provide better quality care.
- RN satisfaction and a supportive workplace are linked to decreased turnover rates.

In addition to staff retention, your support of certification is an investment in your center's performance, reputation, and residents. To learn more about these and other benefits of the course please go to **[geronurseprep.org](http://geronurseprep.org)**.
